# Part 1: News and Infos

## 1. The IARU Monitoring System Region 1 now with 29 members

Our Monitoring Team has now 29 members. 27 members are official, because their societies are members of the IARU. The Tunisian society CAST and Romanian ARR will remain as unofficial members but well accepted and informed as before.

**New member:** Tunisian ARAT as official IARU member. 3V8CB – Ahmed – is now the ARAT MS-Coordinator. Welcome to our family dear Ahmed!

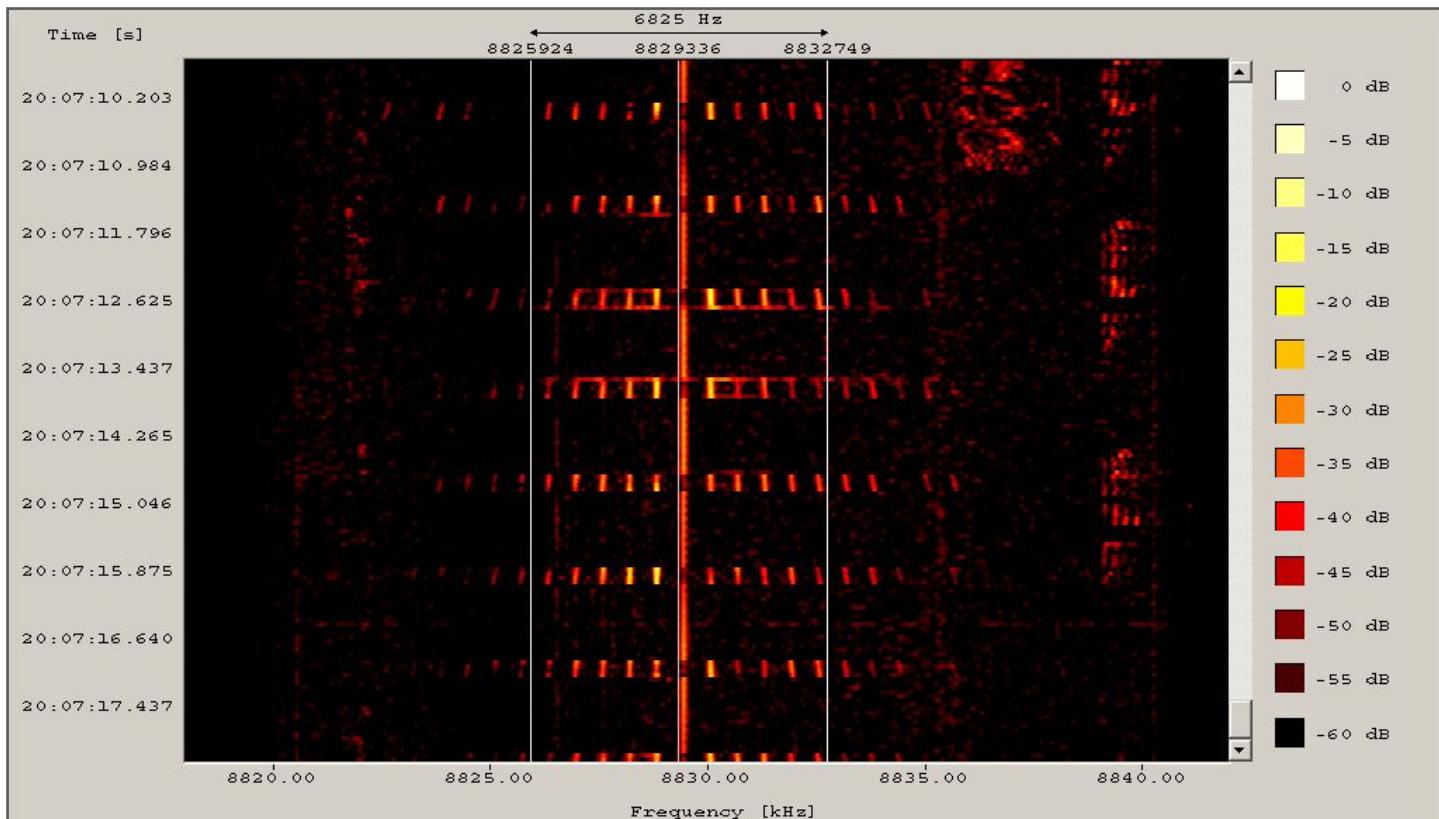

3V8CB – Ahmed – in front of his equipment

## 2. Russian Radio Navigation System BRAS-3/RS-10 on our bands

This hyperbolic navigation system is well known since many years. It is a helpful tool for ship navigation and still in use by the Russian Navy. You can find it daily on 1814 kHz (location Kaliningrad) and 3756 kHz (location Tuapse – east-coast of Black Sea). Parameters: Transmission mode A3E – carrier and both sidebands with short tone bursts (master and slave) or DSB (both sidebands without a carrier). The system on 3756 kHz is not located in Ukraine! Earlier bearings were not precise enough. The following screenshot by DK2OM shows the carrier and each sideband with 7 tones. Screenshot with Wavecom W61PC

soundfile: <http://www.iarums-r1.org/iarums/sound/3756rus.wav>

### **3. Good News**

The Russian (F1B = FSK) system on 7018 kHz (ident REA4) operated by the Russian Airforce Moscow was no longer active in March 2015.

### **4. Bad News - BC**

Radio Hargaysa (Somalia) was still transmitting on 7120 kHz every afternoon. Radio Eritrea appeared on 7175 kHz with very strong signals in Europe. The carrier was unstable.

The BC-transmitter operated by IRIB Tehran on 21510 kHz still caused severe spurious emissions on 21440 and 21380 kHz in March 9<sup>th</sup>. I informed the German PTT.

Voice of Turkey on 7205 kHz (daily at 1830 UTC) produced splatters down to 7190 kHz. The transmitter seemed to be overmodulated.

Voice of Iran on 7200 was also audible on 7195.5 during the afternoons. The German PTT was informed.

### **5. Bad News – 21 MHz**

The Russian voice scrambler "Yakhta" was daily heard on 21000 kHz with voice traffic and the inband synchro signal on 21001.5 kHz in F1B mode with 100 Bd and 150 Hz shift. Location: Nizhny Tagil (area of Jekaterinburg)

The Australian OTH radar "JORN" was daily operating on 21295 in seeklight mode with different sweeprates.

### **6. Bad News – 28 MHz**

An Iranian OTH radar disturbed our band daily on 28300, 28600 and 29000 kHz with 307 and 870 sweeps/sec. (low and high tone). The transmissions covered 50 kHz and the splatters +/- 300 kHz.

### **7. CIS pirates still on 80 m-band**

I found again CIS pirates between 3500 and 3550 kHz during the late evenings. They were operating in A3E = AM with unstable carriers. Locations: Russia and possibly Belarus or Ukraine. It is difficult to find them without the assistance of a sonogram (waterfall). Observe my entries below!

### **8. Mysterious beacon "V" from Vietnam**

I observed a mysterious beacon "V" on 14001.4 kHz transmitting in A1A (= CW) only the letter "V".

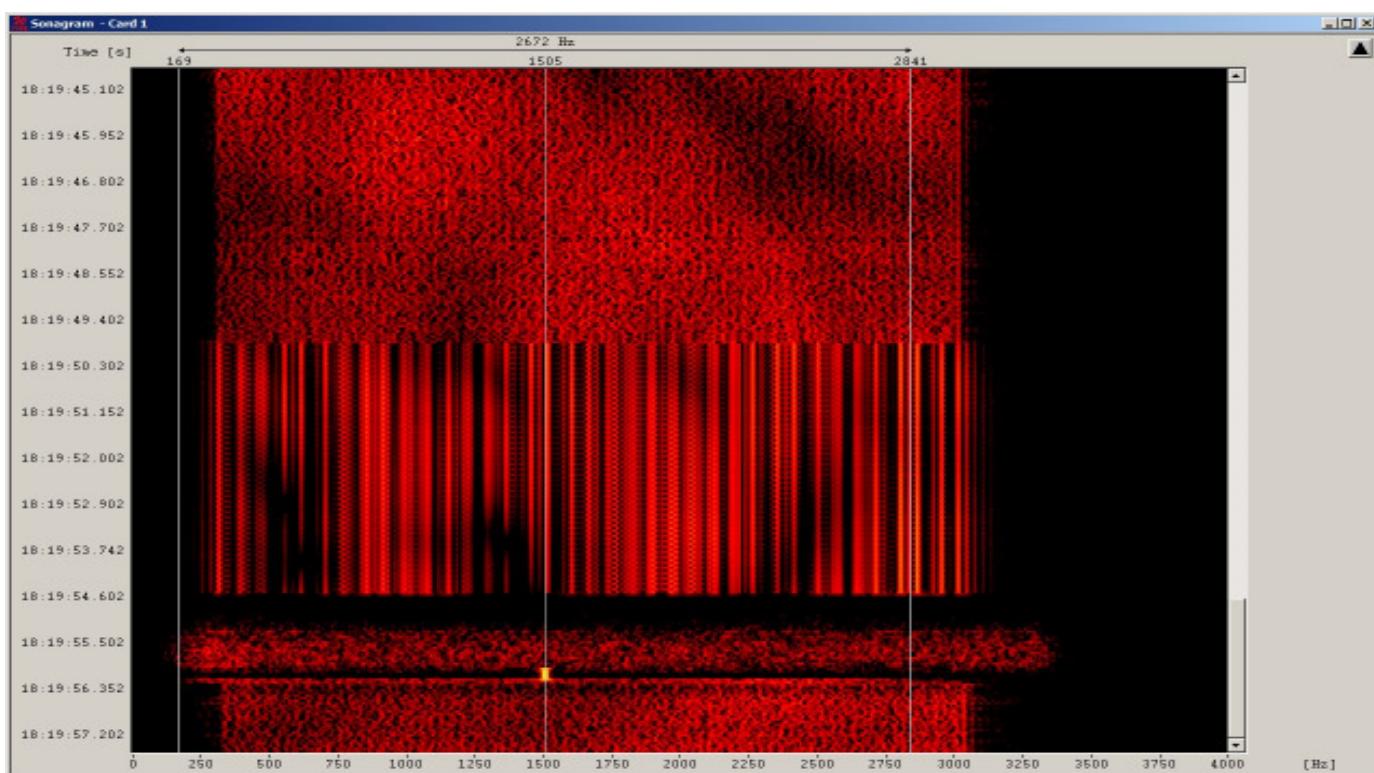

Location: Southern part of Vietnam. Purpose: unknown

### **9. HFD+VL on 14351.690 kHz**

Amateurs asked me for the system on 14351.690 kHz. The system HFD+VL is a test version operated by the University of Las Palmas. It is sounding similar to HF-ACARS (= HFDL) with its intro-tone (1500 Hz AF).

Please observe: The transmissions are out of band! Parameters: OFDM with 73 carriers, shift 2700 Hz

Screenshot: DK2OM with W-Code

### ARSK MONITORING OVERVIEW FOR March 2015

Again Radio Hargeisha was heard in full force on 7,120 kHz with broadcasts both by day and night and the Voice of the Broad Masses, Eritrea, came back on 7185 kHz with one day on 7175 kHz. Unidentified stations were again heard on 7,000, 7040 and 7075 kHz. Those on 7,000 kHz were heard more strongly at the coast and may be Kenya military or Police using both English and KiSwahili with phonetics.

E/H.M. Alleyne, 5Z4NU

ARSK National IARUMS Co-ordinator

\*\*\*\*\*

#### ARSK – Kenya – 5Z4NU (Ted)

H'd by	kHz	UTC	dd	mm	ITU	Identity	MODE	Details
ARSK	7.000.00	vt	dly	3	E. Africa	?	J3Eu	Inidehnified, KiSwahili, East Africa. Possibly Kenya military or Police.

ARSK	7,040.00	1245	6	3	E. Africa	?	J3Eu	Inidehnified, KiSwahili and vernacular, East Africa.
ARSK	7,075.00	vt	dly	3	E. Africa	?	J3Eu	Unknown African language
ARSK	7,120.00	vt	dly	3	Rep.of Somalia	Hargeisha	A3E	Broadcast
ARSK	7,175.00	1655	4	3	ERI?	VOBM?	A3E	Unidentified language and music. Possibly Ethiopian or Eritrean. Voice of the Broad Masses, Eritrea? Stops at 0600 Z
ARSK	7185.00	1430	26	3	ERI?	VOBM?	A3E	May be VOBM.

#### DARC 1 – Germany – DG0JBJ (Mario) – OTH radar intrusions

DG0JBJ (Mario) observed 44 OTH radars on 20 m, 89 OTH radars on 15 m and 97 OTH radars on 10 m in March 2015. A Chinese OTH radar disturbed 160 kHz of our 7 MHz-band on several evenings. The Russian OTH radar Contayner caused strong interference on 7 MHz on several evenings.

#### DARC 2 – Germany - DK2OM (Wolf)

FSK transmissions -> center frequency between mark and space

PSK transmissions -> center frequency - ALE (MIL188-141A) -> USB frequency

exclusive bands -> black – shared bands -> blue - voice traffic -> green - BC -> red

SH = shift --- SP = spread (radar) – SPS = sweeps/sec (radar)
